Git & Github  
Express.js  
Socket.io  
Figma (intermediate)

# SAHIL CHAVAN

FULL STACK WEB DEVELOPER

## PROFILE

A passionate and hard working web developer who likes and enjoys developing beautiful user interfaces and making them fully functional with logic, with core knowledge of HTML, CSS and Javascript. Also equipped with knowledge in frontend frameworks like react.js, node.js for backend and comfortable to work with databases as well. Along with full stack development, i am capable to design pretty good UI designs in figma as well.

## EDUCATION

- Pursuing Diploma in 3rd year of computer engineering, Government Polytechnic Mumbai Sep 2021 - Dec 2023
- Completed schooling from K.E.S V.P.T english medium school roha - raigad in 2021 with a percentage of 99.00

## PROJECTS

### Oncode

A web based coding utility that provides every feature for a coder. Includes a sharable code editor with socket io, code storage over the web, social interaction through community, etc.

### Chatrooms

A mern stack application that enables you to create rooms of your interests and talk with strangers. It uses socket.io for connecting web sockets and also includes host controls.

### Newsfeed

An application that used api integration from news.api to fetch news and show them within the react app. It enables to fetch news based on your country and personal interests as well.

### MusicalHub

This application was made to practice UI design and development with tailwind css. It's focus was to learn design and javascript logic.

## Other project samples

Other work samples includes smaller yet effective web apps which can be viewed in my github profile. It includes many compact projects during my learning phases.
